Profile

Versatile full-stack developer with 8+ years of experience delivering high-quality web applications using Vue.js, Nuxt.js, Node.js, and TypeScript. Adept at both frontend and backend development, with a strong focus on performance, scalability, and user experience. Proven leadership as a certified Scrum Master, guiding cross-functional teams and overseeing smooth deployments in fast-paced environments. Known for thriving in remote, international settings while maintaining clear communication, autonomy, and reliability.

Employment

Freelancer

2023 - Present

Tech Travelers, Asia

- Worked as a freelancer on projects both in solo capacity and in existing development teams.
- Created and deployed both big and small projects from scratch using Nuxt.js, Vue.js, Node.js, and Supabase.
- Built MVPs efficiently by evaluating priorities and selecting the most effective tools for a solo developer to have the quickest launch.
- Set up streamlined development workflows with GitLab CI/CD pipelines, including automated testing, database migrations, and deployment.
- Collaborated with international teams across time zones, ensuring smooth communication and timely delivery.
- Worked fully remote from different countries, while still delivering the same quality work as if I was in the same time zone.
- Leveraged time zone differences to complete finish time related work before people waiting for it wake up, while still keeping enough overlap to communicate with the rest of the team.

Medior developer

2020 - 2023

Saysimple, Haarlem

- Developed the frontend using Vue.js, creating new features and fixing bugs to improve the usability of the platform.
- Built performant backend services using Nest.js and TypeScript, including RESTful APIs and scalable microservices.
- Integrated third-party messaging APIs (WhatsApp, Facebook, Instagram) to ensure reliable message delivery and reception across platforms.
- Wrote unit tests with Jest and enabled them into CI/CD pipelines to automate testing, improving stability and enabling safe, automated deployments.
- Mentored interns and supported onboarding for junior and medior developers, ensuring strong knowledge transfer and team integration.
- Investigated and resolved complex bugs, often assisting teammates in debugging to maintain a high level of service for users.
- Collaborated with departments like customer service to ensure new features matched customer expectations and to efficiently identify root causes of bugs.
- Served as a Scrum Master in a team of 8 people, leading meetings, coaching the team, and coordinating the deployment of tickets to make sure everything goes live smoothly and on time.
- Completed an advanced Scrum Master course and earned PSM II certificate to improve team building and leadership skills.

Freelancer

2017 - 2020

Acali Software, Haarlem

- Developed dynamic and responsive websites using Vue.JS and Nuxt.JS, ensuring optimal user experience and performance.
- Implemented robust server-side functionalities using Express.js, enabling seamless data processing and retrieval for web applications.
- Leveraged Electron to build custom software solutions, streamlining workflows and enhancing overall productivity for clients.
- Designed and developed cross-platform mobile apps using IONIC, utilizing cutting-edge technologies to deliver top-notch user experiences.
- Deployed projects on Linux servers hosted on DigitalOcean

Junior developer

2016 - 2017

Captain Stubing, Beverwijk

- Worked on front-end projects using Angular, React, and Nuxt.js frameworks to build dynamic and responsive user interfaces for web applications.
- Developed microservices using Express.js, building scalable and maintainable APIs.
- Configured NGINX as a reverse proxy to connect microservices and optimize web traffic routing.
- Containerized microservices with Docker and managed orchestration using Docker Compose.

Certificates

PSM II Advanced Scrum Master

2022

Agile Scrum Group

- Demonstrated advanced knowledge of Scrum practices and principles.
- Focused on servant leadership and coaching development teams toward high performance.
- Gained skills in resolving internal conflicts and navigating external pressures affecting the team.

Education

Application- and media developer (completed)

2015 - 2018

Nova College, Haarlem

- Enrolled in a fast-track program aimed at early graduation.
- Focus shifted toward real-world development projects, leading to hands-on experience in web and software development during studies.
- Built and deployed multiple freelance and personal projects while enrolled, laying the foundation for a professional development career.
